

TUESDAY 3 NOVEMBER 6.30-8PM ARTS PICTUREHOUSE, CAMBRIDGE

A CAMPOD EVENT FOR NATIONAL PATHOLOGY WEEK

National **Pathology** Week
2-8 November 2009

THE DEADLIEST DISEASE

Producer/Director Rosalind Bain
Aired on BBC 11 October 2008
45 mins Produced for BBC World

Sleeping sickness is one of the deadliest diseases in the world. The Democratic Republic of Congo suffers more cases than any other country. Without treatment parasites called trypanosomes invade the victims brain and ravage their sleeping cycle, driving them mad before finally killing them. But dedicated doctors and medics are fighting back. Professor Mark Field and Dr Barry Kingston discuss how work in the University of Cambridge, Department of Pathology is contributing to the fight (with Q&A).

A limited number of
£5 tickets are
available from the
Dept of Pathology
to include pre-event
drinks from 6pm
